Umut Çetiner

Umut Çetiner | Founder of kazakhagro.com | Agrotech Solutions Architect | AI-Driven Greenhouse Management & ROI Strategist
Greater Antalya

Özet

A results-oriented Agrotech professional with deep roots in Antalya's (Turkey) premier agricultural ecosystem. I combine over 10 years of hands-on experience in seedling production, seed distribution, and greenhouse management with an academic background in Business Administration. My mission is to revitalize the greenhouse landscape in Kazakhstan (Almaty, Shymkent, Astana) by implementing cutting-edge Artificial Intelligence (AI) optimization models. My expertise lies in diagnosing operational inefficiencies and transforming distressed assets into high-yield, sustainable enterprises. Having personally analyzed the majority of hydroponic facilities across Kazakhstan, I offer a unique 'Zero-Error' management model. I am so confident in my data-driven methodology that I operate on a success-based remuneration model, aligning my rewards directly with the project's ROI and productivity targets."

Deneyim

KazakhAgro Digital (www.kazakhagro.com)
Managing Partner & Agrotech Solutions Architect
Ocak 2026 - Present (2 ay)
Almatı, Kazakistan

Leading an independent digital platform (kazakhagro.com) to modernize Kazakhstan's greenhouse sector with AI and Antalya's operational excellence.

MiKZ Group

4 yıl 11 ay

Direktör

Nisan 2021 - Present (4 yıl 11 ay)

Almatı, Kazakistan

Bridging the gap between traditional agricultural mastery and future-tech.

With 10+ years of experience in Antalya's high-yield greenhouse sector, I am now spearheading digital transformation in Kazakhstan. I implement AI-driven

autonomous management systems to maximize ROI and minimize operational risks

Managed 50+ hectares of high-tech greenhouse operations.
Reduced energy costs by 15% through climate automation.
Specialized in Antalya-Kazakhstan agricultural logistics.

Managing Partner & Agrotech Solutions Architect
Nisan 2021 - Present (4 yıl 11 ay)
Almaty, Kazakhstan (Hibrit/Saha)

Implementing AI-driven operational protocols to enhance yield and optimize resource management in greenhouse facilities across Kazakhstan. Focused on strategic asset revitalization and data-backed ROI management.
